

# Julian Camits

Senior Backend Engineer & Software Architect

📍 Buenos Aires, Argentina    ✉ juliancamits@gmail.com    🌐 JulianCamits    📱 juliancamits-tech

## Summary

Senior Backend Engineer with over 8 years of experience designing and building scalable backends, primarily using .NET and Python technologies. Specialist in financial systems, Azure-based cloud architectures, and modernizing legacy systems into optimized, high-availability microservices.

## Experience

### Remitee, Software Architect

Buenos Aires, Argentina  
May 2025 – Apr 2026  
1 year

- Participated in hiring processes for architecture and technical leadership positions, assessing software architecture knowledge, design patterns, scalability, and technical decision-making skills.
- Designed a shared infrastructure platform composed of more than 10 reusable NuGet packages.
- Defined abstractions for cloud services (messaging, persistence, and cross-cutting concerns), reducing dependency on specific cloud providers.
- Implemented an extensible architecture that enabled the adoption of technologies such as Azure Service Bus and Kafka with minimal impact on consuming applications.
- Implemented a compatibility layer between IdentityServer and Keycloak, enabling automatic user migration during authentication while preserving credentials, claims, and permissions.

### Remitee, Backend Developer

Buenos Aires, Argentina  
Mar 2023 – May 2025  
2 years 3 months

- Developed an internal framework distributed as NuGet packages to encapsulate shared infrastructure concerns and accelerate the development of new services.
- Defined standards for integration service development, unifying messaging, persistence, and error-handling patterns across multiple applications.
- Designed and implemented integration microservices for external providers, communicating through Service Bus with the central processing engine, enabling new partnerships and improving existing integrations.
- Provided technical guidance to client engineering teams integrating REST APIs, including authentication, endpoint workflows, error handling, and performance optimization.
- Participated in technical hiring processes for software engineering positions, including CV screening, technical interviews, and assessment of .NET, database, and software design competencies.

### Mercado Abierto Electrónico, Software Architect / Backend Developer

Buenos Aires, Argentina  
Feb 2022 – Mar 2023  
1 year 1 month

- Designed and implemented the integration between Bloomberg systems and the Central Bank of Argentina (BCRA) using the FIX protocol.
- Defined the system architecture, ensuring scalability and low-latency communication.
- Developed and maintained APIs for financial data exchange and administrative operations.

### Contabilium, Backend Developer

Buenos Aires, Argentina  
Apr 2021 – Feb 2022  
11 months

- Built the migration from a legacy MVC monolith to a modern API and microservices architecture.
- Maintained and improved the legacy system by solving critical fixes and adding new features.

## IT Desarrollo, Backend Developer

- Developed and maintained the module for financial data processing systems (Credit Bureau).
- Built ETL processes to import financial data from banking clients.
- Implemented MSMQ for asynchronous message-based processing.

Buenos Aires, Argentina

Nov 2016 – Apr 2021

4 years 6 months

## Education

---

**Bachelor's Degree** Universidad de Palermo, Information Technology

2017 – 2019

**De-  
gree**

**Associate Degree** O.R.T. Instituto Superior, Programming and Systems Analysis

2012 – 2016

**De-  
gree  
in Sys-  
tems  
Analy-  
sis**

## Skills

---

**Languages:** C#, JavaScript, Python, Java

**Frameworks & Infrastructure:** .NET Framework, .NET Core, ASP.NET MVC, Entity Framework, Azure Service Bus, Kafka, Keycloak, KeyVault, Azure DevOps, Azure Functions, Azure App Services

**Architecture & Patterns:** Microservices, REST APIs, ETL, CQRS, Mediator, SourceGenerators, Analyzers, Clean Architecture, Unite Test, DDD, Event Sourcing, Integrations

**Databases:** Microsoft SQL Server (MSSQL), Postgres, MongoDB, Redis, MySQL, SQLite, ElasticSearch

**Protocols & Tools:** FIX, gRPC, MSMQ, Git, Swagger (OpenAPI), NuGet, JSON Schema

## Certifications

---

- IA for everyone (2026)
- Google Workspace (2026)
- Google Cloud Engineering (2025)
- PMI Certificate & ERP Implementer Certification (2016)
- Microsoft Visual Studio Certification (2015)
- IBM DB2 Database Design & Android Developer (2015)

## Languages

---

**Spanish:** Native

**English:** Intermediate (B1-B2)
